LAKEVIEW  
HEALTH

*Hospitals. Clinics. Specialists.*

## You are not alone...

A diagnosis of breast cancer can be overwhelming – but you don't have to challenge the disease alone. The team of caring professionals at Lakeview Health is here to help you through this difficult time. Our healthcare providers will help you through diagnosis, consults, treatment and follow-up care.

We provide a soothing, healing environment that is close to home. We view our patients as the most important member of our healthcare team. The communication of your needs, desires and input are crucial in helping us provide patient-centered care. This collaborative relationship is a key element of our breast cancer program. A patient recently commented, "I felt free from hassles and worry about who to call and where to go, which allowed me to focus on me, my family and getting well".

## We're here for you...

We provide the latest advances in technology both in screening and diagnosing breast cancer. Once a diagnosis is made, we discuss treatment options with you and your family members to establish a treatment care plan. Your response to treatment will be monitored continuously, to determine if any changes need to be made along the way. We work closely with your primary care provider to ensure best outcomes. Once your treatment is complete, we provide all necessary follow-up care.

## Oncology and Infusion Services

Opening in August 2009, patients will enjoy a newly remodeled oncology and infusion area. We provide chemotherapy, biotherapy and targeted agents, as well as non-chemotherapy infusions such as blood transfusions in a holistic, healing setting. Several options for patients to receive their infusions are available including: semi-private, private and community seating. We provide comfortable waiting areas for friends and families and a private library resource center. Visitors are welcome to dine in our Courtyard Café or visit our Java Coast Coffee Cart. Free parking is available for patients and their families.
